Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claim 7, 11-13, drawn to a gene therapy method of employing SEQ ID NO: 18, and homologous sequences having at least 79% in sequence identity, classifiable in class 514, subclass 44.

Group II. Claims 8, 14-16, drawn to a gene therapy method of employing SEQ ID NO: 20, and homologous sequences having at least 79% in sequence identity, classifiable in class 514, subclass 44.

Group III. Claims 9, drawn to protein therapy method of employing SEQ ID NO: 18, and homologous sequences having at least 79% in sequence identity, classifiable in class 514, subclass 2.

Group IV. Claims 10 and 18, drawn to protein therapy method of employing SEQ ID NO: 20, and homologous sequences having at least 79% in sequence identity, classifiable in class 514, subclass 2.

Group V. Claim 17, drawn to protein therapy method of employing SEQ ID NO: 19, and homologous sequences having at least 93.5% in sequence identity, classifiable in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Groups I, II, III, IV and V are distinct because the method of each respective group is directed to distinct goal, materially distinct steps, and generates distinct functions and effects. Furthermore, within each respective group, the breadth embraces an already enormous number of species and sequence

Art Unit: 1632

variants derived from the recited SEQ ID NO. As such, a search for prior art and consideration of patentability of all claims does not necessarily overlap with one another, thereby generating an undue burden on the examiner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, fall into different statutory classes of invention, and are separately classified and searched, and/or because of the patentably distinct species as listed above (the listed species, as evidenced by each of the respective and art recognized named molecule, are structurally distinct), it would be unduly burdensome for the examiner to search and examine all of the subject matter being sought in the presently pending claims, and thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
